## Letter of recommendation for Mr. Aditya Raj

To whom it may concern,

I am writing this letter of recommendation for Mr. Aditya Raj in support of his application for a M.Sc. thesis. In my role as an interim professor for embedded systems at TU Clausthal, my teaching offer on postgraduate level comprises of two classes on network security and wireless sensor networks. Mr. Raj has participated in both courses, and accomplished a very good result in both of them.

I have personally known Mr. Raj since November 2015, and received the following impression of his academic capacity. Mr. Raj is a hard worker who is eager to broaden his knowledge in the areas of computer networking and its applications. These interests are well aligned with the objectives of the Internet Technologies and Information Systems (ITIS) program in which he is currently enrolled. Mr. Raj is ambitious and passionate about his M.Sc. studies. He always attended my lectures and lab exercises, actively took part in classroom discussions, contributed own solution approaches, and often asked for supplementary material to understand presented topics in depth. During lab exercises accompanying my lectures, he demonstrated his capability to comprehend complex processes in computer networking. In comparison to the cohort of students in aforementioned two classes, I would rate his performance to be within the top 10% of all participating students. Moreover, Mr. Raj is currently completing a 6-month research project with me on heterogeneous sensor networks and fog computing, and has already achieved remarkable results.

I am confident that Mr. Raj will accomplish an outstanding M.Sc. thesis, and I wish him a lot of success in his future endeavors.

Should you require additional information, please contact me at any time.

Yours sincerely,

(Dr.-Ing. Andreas Reinhardt)

Head of the Embedded Systems Group, Department of Informatics, TU Clausthal, Germany
